Lighting as a Service

Ready-to-go: Right from the start

"Give us a deadline for your project and we'll guarantee that we'll meet. With a single point of contact you'll know exactly where the buck stops. We'll save you hassle, money and if you need to, you can even spread the costs."

Herwig Burtscher Vice President Turnkey and Finance Services, ZGS

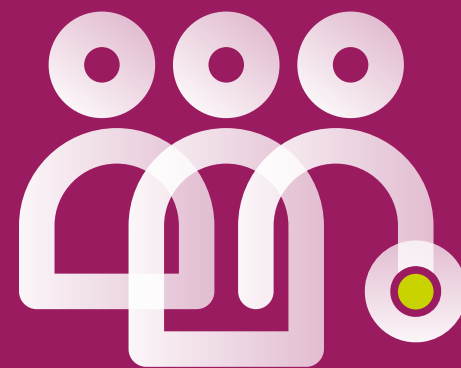

Value added

State of the art lighting solutions for all application requirements. Making spaces save places with qualitative emergency systems. Enjoying exactly the light you need with intelligent lighting management systems. Data insights that go beyond lighting – making your building work smarter with Digital Services. All this equates to significant added value – all from a single source.

Hassle-free

You're in good hands with us. Our experts take care of your lighting solution and you'll only have a single point of contact. This not only saves you the time and hassle of dealing with the various stakeholders, it also reduces your costs and risks by making us your general contractor throughout the whole project.

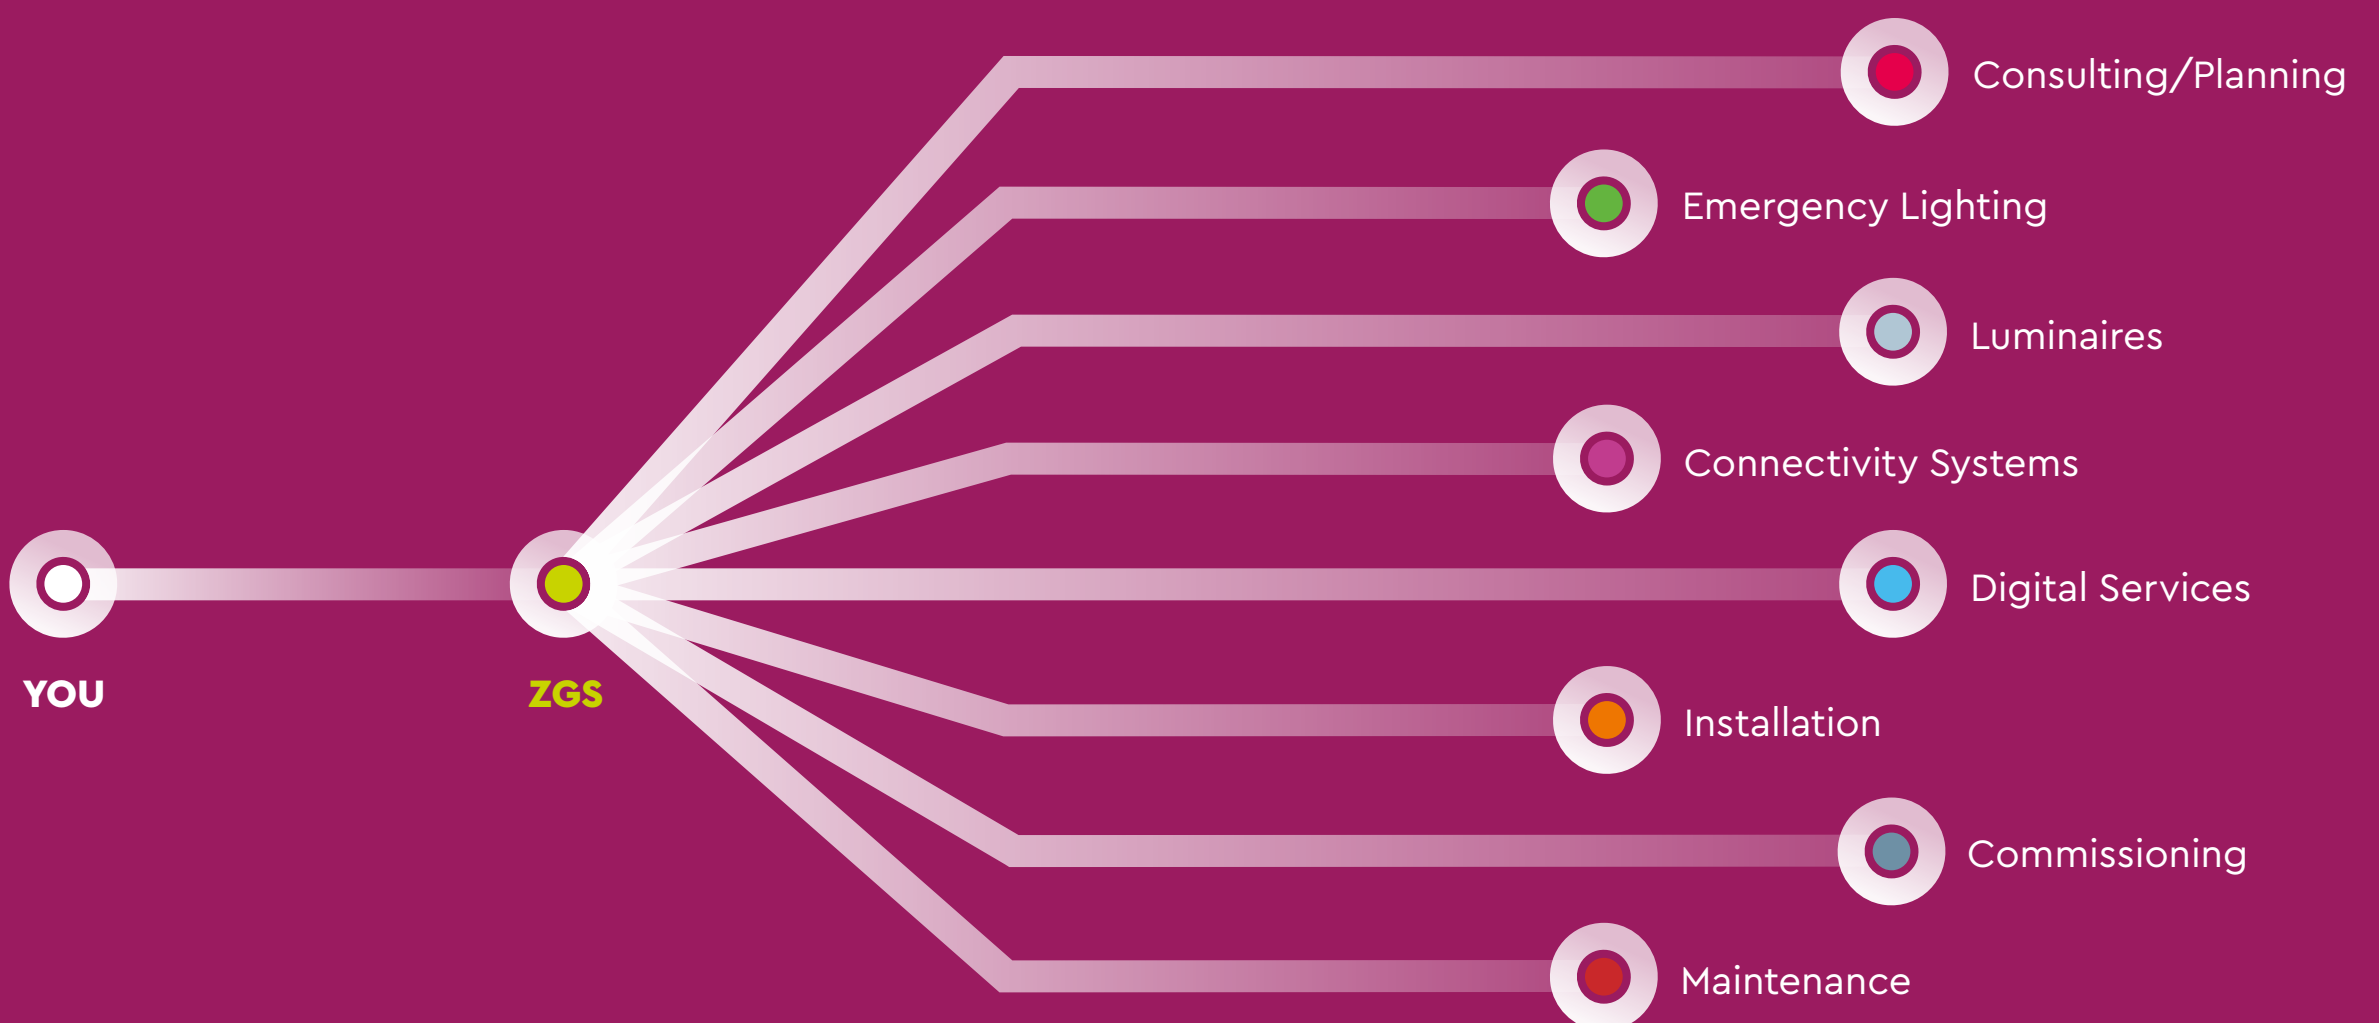

Skills driven

Our strong lighting brands excel with profound application and product knowledge. Together with our service and IoT experts you have a skilled and trusted team looking after your project. This not only ensures reliability but their long-term experience often makes them work quicker and more cost-effectively.

How it works

One-Stop-Shop: Big variety – one source

We tailor your lighting project to your needs: You have one partner for your entire project bringing you exactly what you need – and nothing else. Choose your ingredients from an extensive portfolio of services and products:

"We have the expertise of our employees. ZGS has the class, the quality and the technology so it's a win-win situation for all parties involved."

Michael Weber

CEO Herbert Betz BmbH & Co. KG
Electrical Installations at St. Martin Tower, Frankfurt

Save hassle

End-to-end: your project from A-Z

We support and guide you from A to Z, making turnkey lighting solutions a reality. We take over the responsibility for the complete project management and make your life easier.

1

We do the planning

- including the initial requirement check / check of existing illumination
- including the concept draft & customer presentation

2

We look after the project management

- we draw a detailed implementation concept and a detailed lighting concept
- we coordinate your project partners and guide you through the project

3

We take care of the installation

- the delivery of the luminaires and lighting controls
- removal and recycling, if necessary
- the installation of new lighting equipment

4

We handle the commissioning

- we support you with your initial operation
- we make the final check for you

5

We support you after sales

- we're at your disposal 24 hours a day, 365 days a year
- you can order all services when you need them. From remote to on-site support, only pay when you use them
- Our yearly maintenance service checks that your lighting and systems are running perfectly

"Our clients benefit from a professional project management service from one single source. We're in direct contact with everyone involved."

Herwig Burtscher

Vice President Turnkey and Finance Services, ZGS

Spread the costs with our Finance Services

Avoid any upfront cost. With NOW you can simply pay a monthly fee for your new lighting. The planning, products, installation and commissioning is all included, along with yearly inspections and maintenance.
